E-mail: Cassandra.Jobe@ky.gov

- (1) Provide a brief summary of:
 - (a) What this administrative regulation does: This administrative regulation establishes standards of performance for new stationary sources (NSPS) by referencing the standards of performance for new stationary sources (NSPS), codified in 40 C.F.R. Part 60, pursuant to Section 111 of the Clean Air Act (CAA).
 - (b) The necessity of this administrative regulation: This administrative regulation is necessary to control the emissions of air pollution from stationary sources which have been reasonably determined to endanger public health or welfare. This administrative regulation is necessary to be consistent with the federal regulations codified at 40 C.F.R. Part 60, and for the Cabinet to retain delegation of authority for implementation and enforcement of the standards established under 40 C.F.R. Part 60.
 - (c) How this administrative regulation conforms to the content of the authorizing statutes: KRS 224.10-100(5) authorizes the Energy and Environment Cabinet (Cabinet) to promulgate administrative regulations for the prevention, abatement, and control of air pollution. 42 U.S.C. 7416 requires that state authorities may not adopt or enforce emission standards or limitations that are less stringent than the federal standards. This administrative regulation updates the NSPS to be consistent with the federal standards.
 - (d) How this administrative regulation currently assists or will assist in the effective administration of the statutes: This administrative regulation will enable the Cabinet to continue to implement and enforce the NSPS consistent with the federal standards established in 40 C.F.R. Part 60, pursuant to Section 111 of the CAA. The standards established for stationary sources require emission reductions using control technologies and work practice standards, resulting in cleaner air and protection of human health and the environment.
- (2) If this is an amendment to an existing administrative regulation, provide a brief summary of:
 - (a) How the amendment will change this existing administrative regulation: This amendment updates the existing administrative regulation to include subparts of 40 C.F.R. Part 60 that have been promulgated by U.S. EPA since the last amendment of this administrative regulation. These updates are current through July 1, 2016.

- (b) The necessity of the amendment to this administrative regulation: This amendment is necessary for the state standards for new stationary sources to be consistent with the federal standards for new stationary sources established in 40 C.F.R. Part 60. This amendment is necessary for the Cabinet to retain delegation of authority to implement and enforce the federal NSPS program, and to be no less stringent than the federal standards in 40 C.F.R. Part 60.
 - (c) How the amendment conforms to the content of the authorizing statutes: The amendment conforms to the content of the authorizing statute by adopting standards from new stationary sources that protect public health and welfare. The amendment also conforms to the authorizing statute by being no less stringent than the federal standards in 40 C.F.R. Part 60.
 - (d) How the amendment will assist in the effective administration of statutes: The amendment adopts the federal NSPS to provide for consistency between state and federal regulations for new stationary sources. The new provisions will be enforceable by the Cabinet.
- (3) List the type and number of individuals, businesses, organizations, or state and local governments affected by this administrative regulation.
There are no individuals, businesses, organizations, or state and local governments affected by this administrative regulation beyond those affected by the federal 40 C.F.R. Part 60 NSPS requirements. The Division will retain delegation of authority for the implementation and enforcement of these requirements.
- (4) Provide an analysis of how the entities identified in question (3) will be impacted by either the implementation of this administrative regulation, if new, or by the change, if it is an amendment, including:
- (a) List the actions that each of the regulated entities identified in question (3) will have to take to comply with this administrative regulation or amendment: Entities will have to meet requirements for operator training and qualification, emissions standards, siting, operating limits, compliance, monitoring, performance testing, and record keeping and reporting as contained in the applicable subpart.
 - (b) In complying with this administrative regulation or amendment, how much will it cost each of the entities identified in question (3): There is no additional cost to the regulated entities to comply with this amendment as regulated entities are already subject to the federal 40 C.F.R. Part 60 NSPS requirements. This amendment will allow the Cabinet to retain delegation of authority for implementation and enforcement of these requirements. Regulated entities will work with the Cabinet to comply with these requirements instead of U.S. EPA.
 - (c) As a result of compliance, what benefits will accrue to the entities identified in question (3): As a result of compliance, regulated entities will not be subject to

enforcement actions. The standards established in 40 C.F.R. Part 60 limit the emissions of air pollutants, protecting public health and welfare.

- (5) Provide an estimate of how much it will cost to implement this administrative regulation:
 - (a) Initially: The Division will not incur any additional costs for the implementation of this administrative regulation.
 - (b) On a continuing basis: The Division will not incur any continuing costs for the implementation of this administrative regulation.
- (6) What is the source of the funding to be used for the implementation and enforcement of this administrative regulation: The Division's current operating budget will be used for the implementation and enforcement of the amendment to this administrative regulation.
- (7) Provide an assessment of whether an increase in fees or funding will be necessary to implement this administrative regulation, if new, or by the change if it is an amendment. No increase in fees or funding is necessary to implement this administrative regulation.
- (8) State whether or not this administrative regulation establishes any fees or directly or indirectly increases any fees. This administrative regulation does not establish any fees, nor does it directly or indirectly increase any fees.
- (9) TIERING: Is tiering applied? (Explain why or why not.): Yes, tiering is applied. Standards for new stationary sources differ based on source category and applicability thresholds. However, this administrative regulation adopts the same standards as the federal regulations codified in 40 C.F.R. Part 60.
